

OBJECTIVE

Computer Science undergraduate with strong expertise in Data Structures, full stack web development, and system design. Passionate about building scalable applications and solving real-world problems. Seeking opportunities to apply backend and frontend development skills in impactful projects.

EDUCATION

Noida Institute of Engineering and Technology

B.Tech in Computer Science and Engineering; CGPA: 7.6

Greater Noida, India

Sept 2023 – June 2027 (Expected)

TECHNICAL SKILLS

Programming Languages: C++, Python, JavaScript, SQL.

Core Computer Science: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Computer Networks.

Frontend Development: HTML, CSS, JavaScript, React.js, Responsive Design, UI/UX Principles.

Backend Development: Node.js, Express.js, RESTful API Design, Middleware Architecture.

Databases & Storage: MySQL, MongoDB, Redis (Caching, Indexing, Query Optimization).

Artificial Intelligence: Machine Learning, Deep Learning, Neural Networks, Computer Vision, Prompt Engineering.

Competitive Programming: Solved 100+ LeetCode problems across Arrays, Strings, LinkedList, Trees, Stack.

Tools: Git, GitHub, VS Code, Eclipse.

PROJECTS

Disaster Preparedness and Emergency Response System (SIH Project)

- Built a disaster preparedness platform providing alerts, safety guidelines, and emergency resources.
- Structured real-time data for faster access during emergency situations.
- Designed an accessible and user-friendly interface for improved usability.
- Collaborated with a team during internal Smart India Hackathon.

E-Governance Complaint Management System

- Developed a role-based complaint management system with user and admin functionalities.
- Implemented authentication, complaint tracking, and real-time status updates.
- Built an admin dashboard for efficient issue resolution.
- Enhanced user experience through responsive UI design.

Retirement Corpus & Pension Forecasting Web Application

- Developed a MERN-based financial forecasting application for retirement planning.
- Implemented inflation-adjusted growth models for accurate predictions.
- Built secure backend APIs with validation and modular architecture.

Distributed URL Shortener with Analytics and Rate Limiting

- Built a distributed URL shortening service using Node.js, MongoDB, and Redis.
- Applied Base62 encoding for generating unique short URLs and handling concurrent requests.
- Developed RESTful APIs for URL creation, redirection, expiration, and analytics tracking.
- Integrated Redis caching to reduce database load and enhance performance.
- Applied rate limiting to improve system reliability and prevent misuse.

HACKATHONS & ACHIEVEMENTS

Bhartiy Antariksha Hackathon (ISRO): Participated in a national-level hackathon.

IIT Roorkee E-Summit 2026: National Finalist.

Smart India Hackathon 2025: Cleared internal round.

AWS Solutions Architecture Job Simulation: Completed hands-on simulation.

CERTIFICATIONS

AWS Solutions Architecture Virtual Experience Program – Forage

CISCO Introduction to Cybersecurity Certificate

ISRO Antriksha Hackathon Participation Certificate

IIT Roorkee E-Summit CaseQuest Finalist Certificate
